# THE TOURNAMENT WINDI PLAYER APP

Did you know we run events as USE CLOUD or AT SHOW ?

WHAT DOES THIS MEAN?

USE CLOUD: If a host school provides a dedicated and password protected internet portal – we can instantly upload all information directly to WINDI-USE CLOUD for you and your staff to access files to download anywhere in the world! Results are published at the conclusion of awards.

AT SHOW: If a host cannot provide dedicated and password protected internet portal – we can only connect you to our LAN router and you will use WINDI-AT SHOW to access files to download in the performance gymnasium. Results are published as soon as internet access is available to the tabulator/tech judge, and always by Monday morning.

HOW WILL YOU KNOW - USE CLOUD OR AT SHOW?

Check with your host and ask if WINDI-USE CLOUD or WINDI-AT SHOW will be available at their event. Your TIA Region Coordinator works with each host, so they will also know this information. On show day you can ask the tabulator/tech judge and he/she will know – since they are running the system! Again, the WINDI APP use is determined by the internet access provided by the host school. Tournament cannot change what the host school provides for internet access.

IS THERE A DIFFERENCE?

YES! There are two options in the WINDI PLAYER APP: (1) USE CLOUD and (2) AT SHOW. They are not interchangeable and only work as designated. You need to select the app to match the access provided by the host school. Tournament cannot change what the host school provides for internet access.

REMINDER: Your wireless device must have the WINDI PLAYER APP installed to connect AT SHOW or USE CLOUD on show day. You may use your desktop, laptop, tablet at home and connect through AT CLOUD or through our website, www.njatob.org.
